## ERRATUM

### Erratum: Theory of pure short S-c-S and S-c-N microjunctions [Sov. Phys. JETP 51, 111 (1980)]

A. V. Zaĭtsev

Zh. Eksp. Teor. Fiz. 79, 2016 (1980)

PACS numbers: 74.50. + r, 73.40.Gk, 99.10. + g

In expression for  $I_{exc}$  in Eq. (42), the coefficient 16/3 should be replaced by 8/3. In Eqs. (45) (last two lines), (45'), and (45'') all the terms with the exception of  $V/R$  must be multiplied by  $\frac{1}{2}$ . The expression for  $\sigma(V)$  at  $T \ll \Delta$  should take the form

$$\sigma(V) = 2\sigma \left\{ \theta(\Delta - |V|) + \frac{V}{\Delta} \left[ \frac{V}{\Delta} - \left( \left( \frac{V}{\Delta} \right)^2 - 1 \right)^{1/2} \right] \theta(|V| - \Delta) \right\}.$$

The value of  $\sigma_0(T)$  is  $2\sigma$  at  $T \ll \Delta$  and  $(1 + 4\Delta/3T)\sigma$  at  $T \gg \Delta$ .
